

Glu-Burt - Stick Fan assembly machine

Are you looking for a low cost stick fan assembly machine that can:

- Run almost non-stop and remain reliable
- Provide low maintenance cost/intervals
- Run 23+ different fan body styles
- Produce 1000+ parts per hour
- be setup and run in a small area
- Be easily refilled
- Quickly change fan styles
- Accept mildly warped handles (sticks)

If so, call today and ask about Glu-Burt, a custom assembly machine that does everything listed above. It is easy to use and keep running. The glue system is from Spraymation. The handle (stick) magazine is easy to load. The custom fan body table can be adjusted quickly to hold fans of any size or shape. One of our customers has a Glu-Burt that runs almost non-stop and has assembled over 1 Billion fans!! During this time it has only required \$40.00 in repairs.

Pictures (top to bottom)

- 1) stick used on fans (we can run other styles too!)
- 2) fan body table on left (poles hold body in place - glue head in center applying glue - sticks on right)
- 3) picture of overall machine and hot-melt caddy
- 4) George W. Bush holding a fan assembled by Glu-Burt
